Senior Software Development Engineer experienced in web development, AI, and fullstack engineering. Proficient in Angular, React.js, Node.js, and modern web frameworks. Passionate about creating user-friendly interfaces and solving complex problems through technology. Ready to tackle new challenges in dynamic environments.

WORK EXPERIENCE

Senior Software Development Engineer

Oct 2022 - Present

GDP Labs

Indonesia (Hybrid)

- A software product development arm of GDP Venture (an Indonesian venture builder known for BliBli, tiket.com, and 88rising), develops innovative solutions like CATAPA, GLAIR, and KASKUS for sister companies within the Djarum group ecosystem.
- May 2025: Recognized for creating a Google Chat extraction automation tool that generates weekly discussion reports for each space, streamlining progress tracking and updates.
- Spearheaded the development and maintenance of CATAPA's frontend codebase, ensuring seamless performance and user experience.
- Implemented multi-company functionality, login/register functionality, additional information features, and historical data for several master data.
- Developed customized application extensions to meet specific client requirements, enhancing satisfaction.
- Developed HelpGPT to enhance Help Center efficiency by automating responses, resulting in a 30% reduction in the number of Help Center questions directed to Customer Service.
- Created a comprehensive style guide and component library using Angular, TypeScript, and Bootstrap CSS, enhancing project consistency and improving development efficiency.
- Implemented end-to-end tests (Jasmine, Jest, Playwright) for the CATAPA frontend, significantly reducing reported bugs and improving code quality.
- Mentored interns and subordinates on core software development principles and best practices.
- Created a comprehensive landing page using Webflow, enhancing user engagement by 30% through improved registration, activation, and payment flow features.
- Leveraged Ahrefs, Google Analytics, and Google Tag Manager to optimize website performance, maintain SEO, and drive data-driven decisions.
- Received Employee Special Recognition (May 2025) for creating an automated Google Chat extraction tool, significantly streamlining weekly report generation for team progress and updates.
- Developed and implemented a data migration tool using Nest.js, RabbitMQ, and PostgreSQL to migrate large-scale enterprise data from SAP to a proprietary application.

Full Stack Software Engineer Internship

Apr 2022 - Oct 2022

Jojobug Tech Pte. Ltd.

Singapore (Remote)

- Collaborated on the development of the company's landing page to improve brand presence and user engagement.
- Partnered with UI/UX designers to ensure seamless design standard alignment.
- Accelerated the development of client landing pages using Next.js, resulting in a 30% increase in client acquisition.
- Integrated Firebase for real-time data management and authentication, improving application performance and security.

Laboratory Assistant

Mar 2022 - Aug 2022

Institut Sains dan Teknologi Terpadu Surabaya (ISTTS)

Indonesia (Hybrid)

- Taught, conducted, graded, and created educational materials for practicum sessions. The subjects include Data Structures, Algorithms, and Object-Oriented Programming.
- Developed features for the Online Book System to facilitate online practicum sessions during the COVID-19 pandemic, ensuring continuity of education.

Web Developer

Jul 2021 - Dec 2021

PT. Buana Megah, Surabaya

Indonesia (Hybrid)

- Designed and implemented an internal employee time tracker, enhancing time management and operational efficiency.
- Developed solutions to streamline the payroll process, resulting in a more efficient and accurate payroll system that decreased processing time.

EDUCATION

Bachelor of Computer Science

Aug 2018 - Apr 2022

Institut Sains dan Teknologi Terpadu Surabaya (ISTTS)

GPA: 3.98 of 4

Final Project: Facial Expression Recognition using Deep Temporal Appearance Geometry Network

PROJECTS

GitHub PR Review MCP

Aug 2025 - Sep 2025

- Built AI-powered GitHub automation tool using TypeScript and Node.js with 8 specialized MCP tools for PR review workflows
- Published production-ready package to npm registry with documentation, testing, and open-source collaboration standards

groq-commit

Jan 2025 - Feb 2025

- Engineered and published an NPM package featuring AI-powered CLI tools that automate Git workflows through Groq AI Inference, enabling intelligent commit message generation

CATAPA Landing Page ↗	Oct 2023 - Feb 2024
• Developed a comprehensive landing page including features such as user registration, activation, payment processing, and a blog CMS system. • Utilized modern frameworks and best practices to ensure high performance and scalability. • Collaborated closely with cross-functional teams to align with business objectives.	
Advocacy LA Landing Page ↗	Jul 2022 - Aug 2022
• Designed and implemented a responsive and user-friendly landing page for Advocacy LA.	
N Queen Symbiotic Organisms Search Algorithm ↗	May 2022 - May 2022
• Developed a simulation for the N Queen problem using a symbiotic organisms search algorithm.	

SKILLS
Databases: MySQL, Firebase, Postgres, Supabase
Programming Languages: TypeScript, Javascript, Python, PHP, SQL, HTML, CSS, SCSS
DevOps Tools: Git, GitHub Actions, Docker, AWS
Libraries & Frameworks: React, Next.js, Node.js, Angular, Laravel, Tailwind, Bootstrap, Turborepo
Tools & Platforms: Git, Github Project, Monday, Postman
Design: Canva, Figma, Webflow

CERTIFICATIONS
AWS Certified Cloud Practitioner

LANGUAGES
Indonesian • English
